

Engineer

Company Profile:

Flory Industries is considered a leader in the field of nut-harvesting equipment, with sales worldwide for harvesting almonds, cashews, chestnuts, figs, hazelnuts, macadamia, pecans, tung nut and walnuts. We maintain our competitive edge in the industry by hiring qualified engineers with mechanical expertise who enjoy being around machinery.

Job Description:

- Assist in maintaining all documentation required to manufacture current product-line of 20+ models; including, but not limited to:
 - Fabrication drawings
 - Weldment drawings
 - Assembly documentation and instructions
 - Bill of Materials
- Involved in routine design updates for existing models
- Create and maintain parts books and owner's manuals to be utilized by the end user of Flory machinery
- Responsibility for research projects to assist with product improvement
- Problem solving for manufacturing processes
- Help to improve manufacturing by improved processes and documentation
- Improve engineering documentation by incorporating weld symbols
- Assist with machine design work load

Qualifications:

- BS in engineering or related field
- Good mechanical background, and understanding of equipment
- Self motivated, with great attention to detail
- Proficient with engineering software such as:
 - Solid Works
 - AutoCad
 - Cosmos
 - Excel
 - MS Word
- Comfortable communicating with managers, shop personnel, vendors and customers
